

To whom it may concern,

During the time when I was the president of the ARTEMIS Industry Association I had the pleasure to work together with Chantal Schoen for several years when she was responsible for Events & Relations in the ARTEMIS-IA office. Her contribution to the success of ARTEMIS has always been very professional, supportive and cooperative. She was an excellent team player, and I always appreciated her constructive and empathic way of working together with the Presidium and the Steering Board as well as for the whole international ARTEMIS community.

*Dr. Klaus Grimm - former Director of Electric/Electronics and Software Technology Group Research and Advanced Engineering Daimler AG and 2nd President of Artemis industry Association*
